

Avoca West Recycling

Avoca West is expanding its recycling program. Until the end of the month, it will be collecting batteries, cell phones/pagers, computers and computer hardware, electronics, engine oil, household paint (2 gallons max./drop off), hydraulic oil, ink/toner cartridges, metal, paper, Styrofoam, televisions, transmission fluid, and old footwear. These items, except the ink/toner cartridges and footwear, will be taken to the Northfield Township Road District. The ink/toner cartridges will be included in Avoca West's "Funding Factory" Program. Clean used footwear will be donated to "Share Your Soles" program, a Chicagoland charity.

*******Interested individuals please arrange for a drop off date by emailing Steve Brown at thesustainableway@gmail.com. *******

Please list the drop off items and estimated size of large items. Only a few families will be scheduled for recycling drop off each day since only one truck load will be taken per day, and we do not want to cause traffic problems. Steve will park his truck in the lot east of the lunch room. **Drivers and walkers will drop off at this location.** Steve will immediately load the items into his truck. Families not dropping off children, with their cars but live in the immediate area of the school, contact Steve for possible curbside pick up. Those not able to meet the guidelines above including bus rider families that cannot "car pool" items with a neighbor, or they have very large items, please drop off these items at Northfield Township Road District, 1928 Lehigh Avenue, M-F, 7 -3, until Nov. 4th.
