

## 2011 Technology Mission and Beliefs

### **The mission of educational technology is to:**

Continuously improve teaching, inspire innovation and cultivate collaboration, thereby increasing student learning and achievement.

### **Beliefs**

Effective use of technology ignites engaged learning, critical thinking, and creative problem solving.

Technology is most effective when meaningfully integrated throughout the curriculum and used to differentiate instruction.

Staff proficiency, along with an effective support system, is critical to the successful use of technology.

Technology investments must be educationally meaningful and deliver measurable results.

Leveraging technology maximizes communication and connectedness throughout the community.
